"Telegram Order Alert" for PrestaShop

Installation

Installation doesn't require extra actions.

- from addons.prestashop :

1. In your store's administration interface, click on the tab to connect to PrestaShop Addons, in the upper right of the page.
2. Enter your login information in the box.
3. Now all of your purchases will appear directly in your list of back-office modules!
4. After connecting to Addons from your store's administration interface, click on the "Modules" tab in the menu.
5. Look for the name of the module you want, click "Install", then configure it.
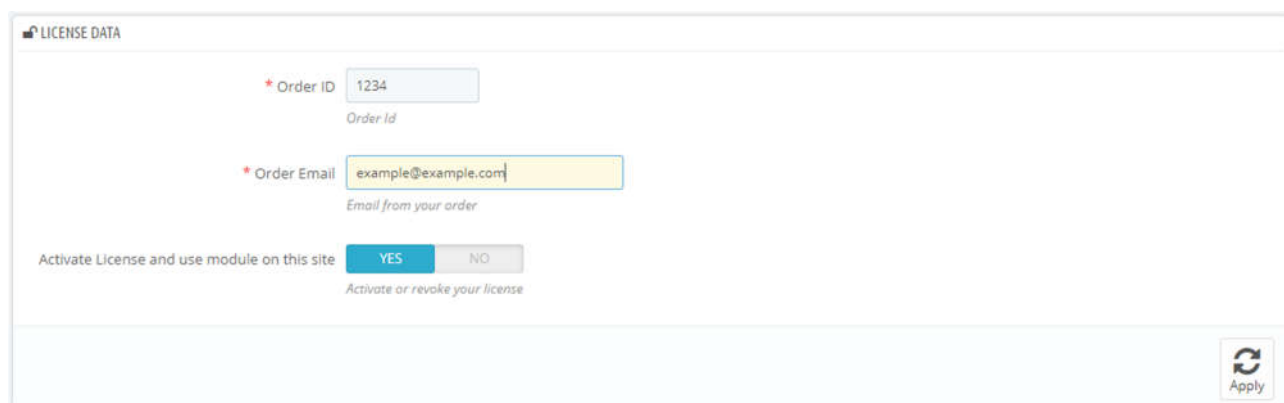

- from zip file :

1. In your store's administration interface click on the "Modules" tab in the menu.
2. Click on the "Upload Module"
3. Locate zip file and click "Open"
4. Then configure it.

Upgrade from FREE to PRO version

- Completely uninstall the FREE version with check-in "delete module folder"
- Install the PRO version follow the manual above

License Activation

Fill ID and eMail from your order in the field below, turn activation status to YES and click APPLY button.

NOTICE. All modules have a single domain license. For using this module on the second domain – you should buy it again.

Back-office. Module configuration (general config)

After installation you need to configure the module:

Fill *bot_id* and *chat_id* in the setting page of the module and configure notification fields **

** **How to create Telegram Bot and get ID please follow this manual:**
